

SONIC
REFERENCE
LABORATORY

A Sonic Healthcare Company

Sonic Reference Laboratory is proud to offer a 20 pathogen respiratory panel in a single nasopharyngeal swab.

- Identify bacterial or viral pathogens
- Direct effective treatment
- Facilitate control of infections

RESPIRATORY PATHOGENS BY THE NUMBERS

200,000
Americans
hospitalized each
year with influenza

30,000
American deaths
caused by
influenza

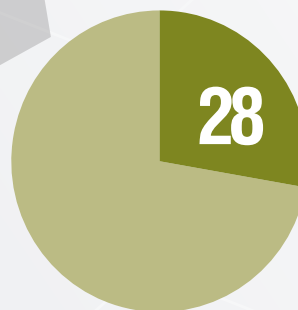

Average number of
respiratory viruses
per child per year

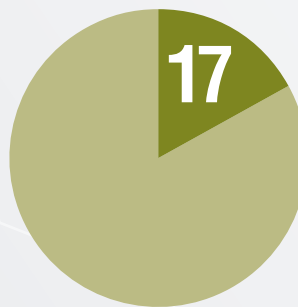

Average number of
respiratory viruses
per adult per year

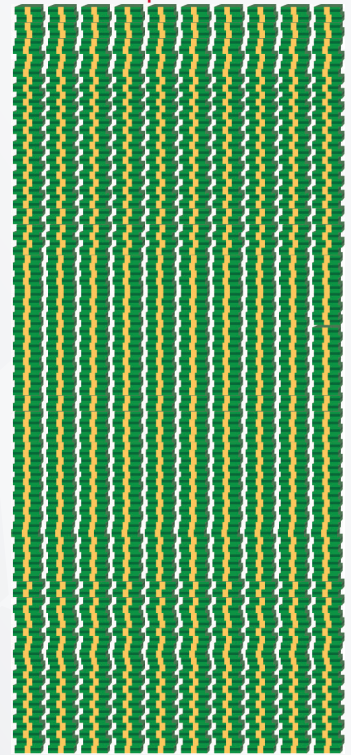

Percent of accurately
diagnosed hospital
influenza cases

Percent of accurately
diagnosed outpatient
influenza cases

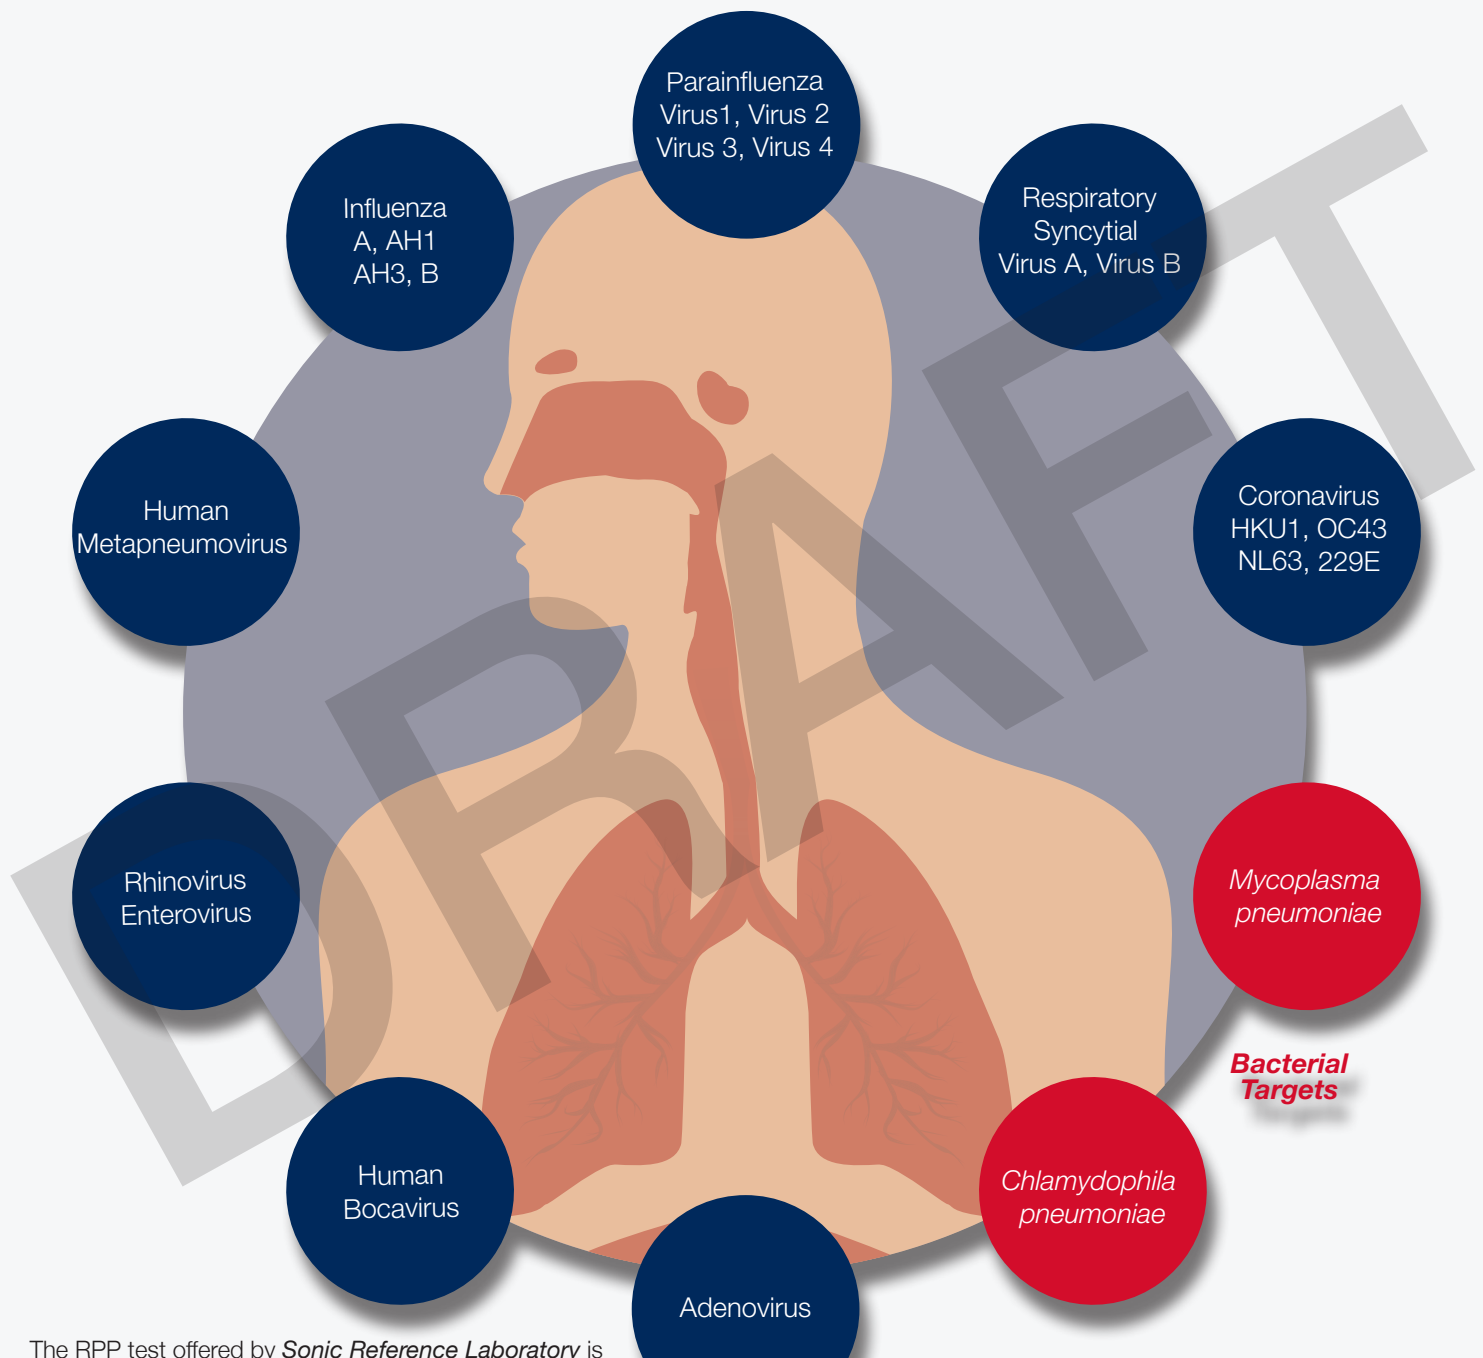

Cost of respiratory viruses
= \$10 million **\$10 billion**

Respiratory Pathogens Panel

Detects 20 pathogens in a single test

The RPP test offered by **Sonic Reference Laboratory** is intended for detection and identification of viral and bacterial agents in nasopharyngeal swab collected from symptomatic adult and pediatric patients suspected of respiratory tract infections.
